

University Department of Geology

A. Program outcome for the entire course

The outcome of the M.Sc. Geology program is encouraging. The students, in addition from Jharkhand, come from neighboring state of Odisha and West Bengal for the said program. After completing the course, they came out with flying colors.

B. Program Specific outcomes for each specialization.

Presently, there is only one specialization i.e. 'Fuel Geology' which includes coal, petroleum, nuclear fuel, natural gas, and non-conventional energy. There is moderately high demand of students of this specialization, especially in the energy sector.

C. Course-outcome

There are all together 16 theory papers and 4 practical papers. The theory paper covers the whole range of geological education such as structural geology, crystallography, mineralogy, petrology, stratigraphy, paleontology, engineering geology, exploration geology, economic geology, remote sensing & GIS, hydrogeology etc. The practical part of the course curriculum covers the part taught in the theory papers and relevant for industries.
