WORLD BLOOD DONOR DAY(14-06-2018)

World Blood Donor Day takes place on 14 June each year. The Day was created to:

- Raise global awareness of the need for safe blood and blood products for transfusion;

[Handwritten Signature]
Co-Ordinator

- Highlight the critical contribution voluntary, unpaid blood donors make to national health systems;
- Support national blood transfusion services, blood donor organizations and other nongovernmental organizations in strengthening and expanding their voluntary blood donor programmes by reinforcing national and local campaigns.

The day also provides an opportunity to call to action governments and national health authorities to provide adequate resources to increase the collection of blood from voluntary, unpaid blood donors and to manage access to blood and the transfusion of those who require it.

Blood and blood products are essential resources for effective management of women suffering from bleeding associated with pregnancy and childbirth; children suffering from severe anaemia due to malaria and malnutrition; patients with blood and bone marrow disorders, inherited disorders of haemoglobin and immune deficiency conditions; victims of trauma, emergencies, disasters and accidents; as well as patients undergoing advanced medical and surgical procedures. The need for blood is universal, but access to blood for all those who need it is not. Blood shortages are particularly acute in low- and middle-income countries.

The specific objectives of this year's campaign are to:

- thank blood donors in the world and create wider public awareness of the need for regular, unpaid blood donation, highlight the need for committed, year-round blood donation, to maintain adequate supplies and achieve universal and timely access to safe blood transfusion;
- recognize and promote the unpaid blood donation in enhancing community solidarity and social cohesion values of voluntary;
- raise awareness of the need for increased investment from governments to build a sustainable and resilient national blood system and increase collection from voluntary non-remunerated blood donors.

This programme was organized by Jamshedpur Blood Bank, Jamshedpur. A total 9 Colleges [JSR co-operative college, Karim City Collge, GIIT, Ms. KMPM Voc. College, ABM Collge, LBSM Collge, GSCW, JSR & JKS Collge, JSR] were participated alongwith 14 POs and 80 Volunteers.

CASHLESS TRANSACTION(17-07-2018)

It's safe to say that cashless transactions have revolutionized the financial outlook of India. Utilizing mobile phones to make payments instead of opting for the traditional modes of payment has increased tremendously since demonetisation. When the business operations of most SMEs came to a standstill during demonetisation, the businesses that had shifted to cashless transactions managed to curb losses.

The convenience and security associated with these payment modes is an important factor in the surge. With the recent introduction of several digital modes of payment in India, business owners are slowly adapting to the shift.

In cashless transactions, payments are made or accepted without the use of hard cash. This includes payments made via credit/debit cards, cheques, DD, NEFT, RTGS or any other form of online payment that removes the need for cash.

As a business owner, customer satisfaction is your main goal. This is because you want your customers to have a great experience and keep coming back to do business with you. But processing the customer payments can become an arduous and time consuming process. In most cases, this is because the payment options you've offered are more convenient for you than your customers.

Offering a variety of payment options will allow customers to choose their preferred method of payment, which will get you paid faster. Adding online payments to your options gives your customers the flexibility to pay through the option that is most convenient for them. Business owners and consumers can both benefit from digital payment modes in various ways.

GENDER SENSITIZATION PROGRAMME

Gender sensitization refers to the raising sensitization of gender equality concerns. It helps people in examining their personal attitudes and beliefs and questioning the realities of both sexes. Gender sensitization make people understand the difference between sex and gender, how gender is socially constructed and the stereo types around gender roles. It helps them determine which assumptions in matters of gender are valid and which are stereo typed. Need of gender sensitization is to create awareness among the working professionals about the importance of gender sensitivity in organization. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender. Gender is Socially Learned behavior, based on social expectation from Men & Women. The women and children are most vulnerable group of this situation. And it's the undue pressure on Boys & Girls to live up to the established norms of Masculinity & femininity. Girls endure unwarranted social control, discrimination & domination. Boys discouraged from being emotional, gentle or fearful. Gender Sensitization gives a clear and precise view about Gender and help to understand that GENDER is not about "Women" it's about "People".

NSS CELL, Kolhan University, Chaibasa alongwith all NSS holding Colleges organized "Gender Sensitization Programme" on 19th January, 2019 and in this programme 15 Colleges, 20 POs, 02 teachers and 205 Volunteers were participated.
